GIULIANO LIKER

UI/UX DESIGNER
& FRONT-END DEVELOPER

I'm UI/UX Designer and Front-End Developer from Toronto, Canada. I started my professional career back in 2000. Since then I had the pleasure working with hundreds of clients, and much more projects, ranging from small single page experiments to large corporate or government projects.

Occasionally I would stray into print design but my true love would always be interactive design.

At work I'm a passionate perfectionist who loves healthy competition and challenges.

If I'm not at work I'm probably building RC model airplanes, freediving, riding motorcycles or imagining I know how to play piano and guitar.

TOOLS & SKILLS

I usually start my day in one of the wireframing tools like Axure or Balsamiq. After layouts have been fine-tuned I would fire-up Photoshop and start experimenting with different UIs. If projects allows I would sometimes design directly in browser. Part of my daily routine always involves research and skill improving.

Aside from having passion for design I also enjoy coding my designs in HTML, CSS & JS. Most of my designs have been powered by Twitter Bootstrap, COMPASS + SASS.

When working in team environment I prefer organized approach following Agile / Scrum methodology to get the best use of my time.

To see few samples of my work please visit my portfolio at www.giulianoliker.com.
